

SMALL COTTON STOCK MARKET

Increasing Attention Given by Operators to Grain Crop Conditions.

NEW YORK, April 14.—There was a notable lack of activity in the stock market, reaching a stage resembling torpidity at times. A large proportion of the day's operations at the present period are supposed to originate within the walls of the Stock Exchange building amongst the professional corner traders.

It is apparent that increasing attention is given by the stock market operators to grain crop conditions. The advance from the spring wheat market to-day seems to originate in highly speculative state emphasizes the effect of news factors in that market, and by reflection, in the stock market.

Some slight unsettlement in the opening dealing was due to fears of the effect of the Turkish troubles. This selling appeared to come from local sources in anticipation of foreign exchange, but was not continued.

The coal road stocks were strong as a group, withstanding the pressure. There was some further activity in the American Tobacco group, and reports continue to be heard of the maturing of the plan for the extensive financing of that company.
